1 Introduction

2 Getting started

→ The name MATLAB stands for MATrix LABoratory

- <http://www.mathworks.com>
- <https://www.mathworks.com/products/matlab-online.html>

→ Advantages

- Powerful built-in functions, easy to use
- Visualization
- Good documents

→ Disadvantages

- Can be slow without C++ integration (MEX -setup C++).

Preparing MATLAB

→ <https://www.it.miami.edu>

Restrictions

Costs

- There is no cost to use this software.

Documentation

Download Information

- Email software@miami.edu to obtain access to the University site license.
 - Log into your [Mathworks.com](https://www.mathworks.com) account.
 - Click on My Account, then click on Manage Licenses.
 - Select License number 893205 Total Academic Headcount and click on download software.
 - Click continue, as the default option is the one you need to download.
 - It will then request your operating system.
 - It will then ask if you wish to download all of the products or for you to choose which products you want.
 - After your selection, download the installer, run the installer, and it will download your software.
- Already have a University site license? [Click here to download MATLAB](#)

1 Introduction

2 Getting started

Getting started - MATLAB GUI

Getting started - MATLAB GUI

- Current Folder
- Editor
- Command Window
- Workspace
- Command History (Optional)

Getting started - Documents & Help

- > help sqrt
- > doc sqrt
- > lookfor regression
- > Google it!

Getting started - Source code

- > .m file
- > .mlx file (interactive MATLAB src code)
- > .cpp/.f (mex *.cpp/*.f) Speed up!

Signals and Systems using MATLAB 1st Edition, by Luis Chaparro.
So, let's try the MATLAB!
